Denmark Supa IGA

CASE STUDY

A store unchanged since the 1980s, reborn as a modern local favourite

Client	IGA Denmark
Location	Denmark, WA
Project Type	Supermarket
Scope	Supermarket shelving, densed ends, produce displays

IGA Denmark had served its community since the 1980s, but its refresh came with a tight delivery window and minimal room for disruption to trade. To keep the refurbishment moving, the entire fixture package had to be planned and sequenced from day one.

The Fit-Out

- ADP S-Mart Supermarket Shelving with customised Densed End units and Cigarette cabinets (~5% more shelf capacity in the same footprint)
- Produce bunk displays and end bay bins
- Shelf accessories including data strip, hooks and ticket frames
- Checkout counters and Bakery shelving

The Result

The result is a consistent store experience, from grocery to produce, delivered on a tight turnaround. Modular shelving refreshed the main floor, while matching bunks, ticketing and signage carried the look into fresh.

Why It Stands Out

A decades-old layout transformed into a fresh, modern retail space without missing the deadline.
