Jayco Adelaide

CASE STUDY

“Wow, how great does it look?” That’s the first thing every customer says

Client	Jayco Adelaide
Location	West Beach, SA
Project Type	Automotive / Leisure Retail
Scope	Gondola shelving, showroom fixtures, heavy-duty display solution

Jayco had to be out of its old site by the end of December, but opening between Christmas and New Year wasn’t realistic. The new showroom ended up opening just two days before Christmas, and needed to safely display heavy ARB bullbars (80-90kg) without visible bracketry.

The Fit-Out

- ADP Gondola range, finished and ready ahead of the opening
- Heavy-duty bullbar display solution with concealed bracketry
- Consistent showroom fixtures throughout
- Ongoing follow-up support for additional products post-opening

The Result

With the gondola range finished ahead of time, the Jayco team could walk in, position fixtures where they wanted them, and start stocking straight away, hitting the pre-Christmas deadline.

Why It Stands Out

A polished showroom fit-out delivered in time for a high-pressure, two-days-before-Christmas opening.

> "Every single customer walks in the door and says, 'Wow, how great does it look?' ... ADP got all the gondolas built for us, so we could set them up and start stocking straight away. 100% recommend anytime."
