United Petroleum

CASE STUDY

One flexible shelving system, rolled out across a fast-growing fuel and convenience network

Client	United Petroleum
Location	Various sites, national rollout
Project Type	Petrol Convenience
Scope	Gondola shelving, end bays, display accessories

As one of Australia's fastest-growing Petrol Convenience operators, United Petroleum needed a fixture solution that could roll out quickly and consistently across multiple new stores, each with its own footprint and product mix.

The Fit-Out

- ADP S-Mart Gondola Shelving with 300mm shelving, built for small-footprint sites
- ADP S-Mart End Bays
- Magazine racks and display accessories
- Shelf depth options: 300mm, 370mm, 470mm, 570mm
- Horizontal or angled shelf configurations

The Result

A single, proven shelving system gave United Petroleum the flexibility to tailor each store to its own volume and range needs, supporting a rapid, multi-site rollout without reinventing the fit-out each time.

Why It Stands Out

A repeatable shelving system flexible enough to support a national rollout at pace.
